BEST AVAILABLE COPY

Process for the preparation of N-phosphonomethyl glycine and N-phosphonomethyl glycine prepared thereby.

The invention provides a process and the product of process for the preparation of N-phosphonomethyl-glycine comprising the oxidation of an aqueous suspension of N-phosphonomethyl-imino diacetic acid in the presence of a

catalyst with oxygen or an oxygen-containing gas.

Comparing the process of the invention with the known processes, specific conversion is considerably increased and significant amounts of energy can be saved.
